

Aitor Reviriego Amor

Full Stack Developer | Refactoring, TDD & Code Quality

Valencia, Spain | [linkedin.com/in/aitor-reviriego-amor](https://www.linkedin.com/in/aitor-reviriego-amor) | github.com/aitorevi | info@aitorevi.dev

Profile

Software Developer focused on building sustainable software. At Lean Mind I have rotated through projects across different sectors (HVAC, Fintech, e-commerce), adapting to new stacks (Java, TypeScript, C#/.NET) without sacrificing quality. I apply TDD, Clean Architecture and Refactoring as the foundation of all my work, and amplify that discipline with advanced AI usage. Over 20 years of prior business management experience bring product vision and maturity to the team.

Experience

Mar 2026 - Present

LEAN MIND · SOFTWARE DEVELOPER

Enterprise Billing & Compliance Platform

Integration in corporate billing platform with multi-country regulatory compliance. Refactoring and stabilization of legacy code applying Clean Architecture, SOLID and TDD. Advanced use of AI as a key tool to analyze, understand and evolve complex codebases.

C#

.NET

Jenkins

GitHub Copilot

Legacy Code

AI-Assisted Development

Oct 2024 - Feb 2026

LEAN MIND · SOFTWARE DEVELOPER

Internal Projects & Automation

Complete redesign of corporate website focused on clean architecture, design, accessibility and SEO. E-commerce integration with Shopify. Development of time tracking tool with fully AI-guided development. Cloud infrastructure migration and continuous deployment. Intensive use of AI agents and workflows as a productivity multiplier across all projects.
